

## ČATEKS D.D.

Company draws its tradition of excellence in textiles since the early days of 1874. Generations of employees have given their best to satisfy the ever changing needs for dependable products that help people feel safe and protected.

Historical circumstances have made Čateks an expert in defense textiles and uniform procurement as well. First defense textiles were primarily polycotton fabrics, but staying true to its focus on innovation, Čateks already has more than a decade-long experience in production of high-demand CORDURA® NYCO fabrics and is also proud to be listed among the select few EU based CORDURA® Authorized Mills.

## ČATEKS DEFEND

Čateks Defend stands for top quality fabrics for MIL/LE garments created out of:

- CORDURA® NYCO (nylon/cotton) materials
- blends of cotton and polyester (polycottons)
- 100% cotton
- compositions with inox or carbon fibers for antistatic properties
- compositions with FR fibers for flame resistant properties
- Iaminated materials (with or without PTFE/PU membrane)
- polyurethane (PU) coated materials

All these products can be specifically engineered to satisfy strict and specific technical specifications.

NDARD 100

## CERTIFICATIONS

#### NATO OTAN AQAP 2110

AQAP 2110 certificate contains NATO requirements for product quality.

It also enables the process control of ordered goods by the representatives of the Croatian Ministry of Defence, therefore eliminating the need for costly and time-consuming business trips.

#### ISO 9001:2015

Continuous ISO 9001:2015 certification is a testament to company's focus on product quality and customer satisfaction.

It assures the clients that products and services are made to fulfill their demands and it also provides the management constant oversight to ensure continuous growth in quality and efficiency of the production process.

#### OEKO-TEX® STANDARD 100

Čateks's clients can rest assured that the goods they receive are in sync with highest ecological standards of the industry

## **PRODUCTION CENTERS**

vertical integration

## PC TEXTILES

- weaving
- printing
- dyeing
- textile finishing

#### PC COATING & LAMINATION

 production of coated and laminated materials for a wide range of purposes

#### PC CUT & SEW

- garments
- medical products
- homeware

## RESEARCH AND DEVELOPMENT

#### **R&D OFFERS:**

- R&D of new fabrics and materials
- new camouflage design
- existing camouflage reproduction
- in-house laser screen engraving
- colour development
- colour reproduction
- rotary screen print up to 8 screens

#### PRINTING AND DYEING CAPABILITIES:

- CORDURA® NYCO
- polycotton
- 100% cotton and blends
- wide variety of:
  - woven fabrics
  - knitted fabrics
  - nonwoven

#### MOST COMMONLY USED DYESTUFFS:

- reactive
- reductive
- pigment
- disperse

## TACTICAL COLOURS

**RAPTOR GREEN** 

**STEEL GRAY** 

DARK BLUE

DEEP BLACK

**STONE GRAY** 

Ö

Besides a comprehensive range of popular tactical solid colours, we are well equiped and staffed to develop any specific colour based on a sample or specification values.

## CORDURA® NYCO ADVANTAGES

CORDURA® NYCO (nylon cotton fabric made with original CORDURA® nylon 6.6 fiber, developed and produced by Invista USA) is a breakthrough fabric primarily geared towards defense use. Čateks has more than a decade of experience in its production.

#### ADVANTAGES OVER STANDARD UNIFORM FABRICS:

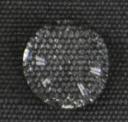

- protective
- economical
- comfortable
- durable
- versatile
- increases force survivability and availability

#### NO MELT NO DRIP PROPERTY

The principal property of CORDURA® NYCO is No Melt / No Drip - when set on fire, the fabric burns in a controlled fashion and does not have any melting and burning debris, reducing the burn injury potential.

## SPECIAL PURPOSE FABRICS & FABRIC FINISHES

Since tactical operations can be conducted in areas with a wide range of challenges, our fabrics can be made accordingly.
